Non-linear editing systems (NLEs) were, up until the early 90's, oppressively expensive. Avid NLEs ruled the market and an Avid system could cost up to 6 figures. Several smaller companies were creating NLE platforms of their own that had two major selling points: they were much more affordable and their entire workflow and editorial process was brand new. Avid systems were tied to the ...

Jargon Defined: Linear vs Non-Linear Editing. Ok, think TT (Throwback Thursday). In the not so distant, old days, editing was linear. You added one video clip to another in sequential order and going back and changing something, meant the entire sequence after your edit, meaning going forward, needed to be moved up as well. Think even further back to editing filmstrips: You took out a section ...
