[Physics Conservation of Energy Worksheet Solutions](#)

In a chemical reaction the motion of individual atoms is governed by the law of conservation of energy. In a closed system, a system that is separate from its surroundings, the total energy of the system always remains constant, even if any physical or chemical change happens. Conservation of energy is the term used to understand change in energy from one form to another.

[Conservation Of Energy Worksheet | Teachers Pay Teachers](#)

Conservation of mechanical energy. Law of Conservation of Mechanical Energy: The total amount of mechanical energy, in a closed system in the absence of dissipative forces (e.g. friction, air resistance), remains constant. This means that potential energy can become kinetic energy, or vice versa, but energy cannot "disappear". For example ...
