The chapters in this book focus on how university-school-community (USC) partnerships are implemented in colleges, universities, school systems, and community organizations around the world.

[The Importance of Educational Partnerships](#)

Partnerships for Digital Education Readiness (in the fields of school education, vocational education and training, and higher education): these projects aim at equipping education and training systems to face the challenges presented by the recent sudden shift to online and distance learning, including supporting teachers to develop digital competences and safeguarding the inclusive nature of ...

[Innovating Professional Development in Higher Education](#)

It will also explore innovation and some of the challenges to innovation in higher education, as well as some of the successes. While this paper will, by no means, provide a definitive direction for colleges and universities, it will recommend some changes that can be implemented on any campus to improve outcomes and efficiencies. It is the hope of the author that this paper will inspire ...

Also note, the point of this post isn't to showcase how innovative higher education is but rather to point out innovations that are out there as a kind of survey while also hopefully helping pollinate the possibility of innovation in the upper end of the field and 'industry' of education. With that in mind, I started out with the more common, perhaps less exciting examples.
